THE MESOCOSMOS AND BIOLOGICAL ARCHITECTURE.

2.14- *Palm Grid*

The Palm lines deflect with the Copper and just as the Hartmann lines form a grid and are walls of electromagnetic energy emanating from the subsoil and that extend vertically up to a height of 2,000 meters, they are everywhere, both on flat land and in the mountain, in the water, outside and inside the houses. They are oriented according to the geomagnetic poles. Its intensity and density are very variable, depending on innumerable factors such as the time of day and atmospheric changes.
